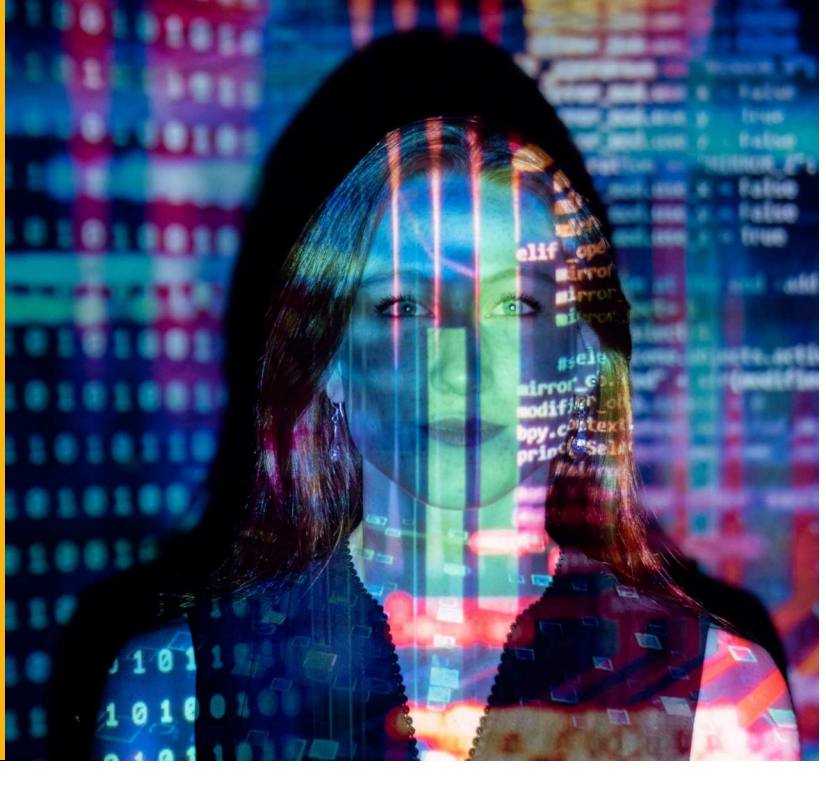
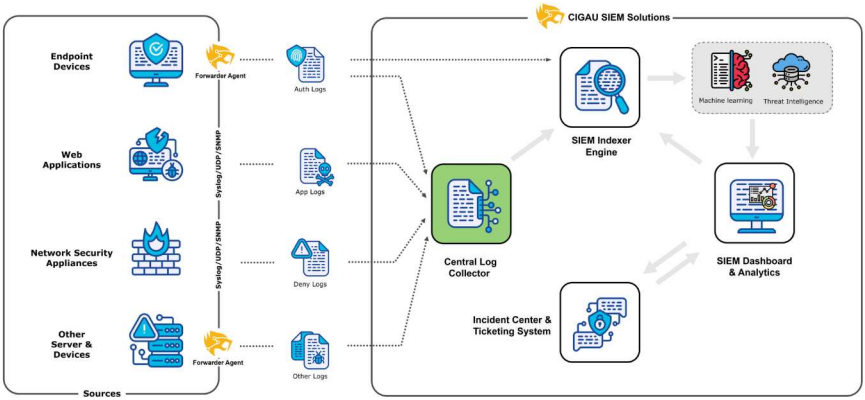
# Cigau SIEM Solutions

Gain deeper visibility into your IT environment and detect suspicious activity with our advanced SIEM solutions. Protect your critical assets and stay compliant with our comprehensive SIEM platform.



**STAYING AHEAD OF CYBER THREATS, SO YOU DON'T HAVE TO**



High-Level Architecture

## Get real-time security visibility and threat detection with our advanced SIEM solution.

Cigau SIEM Solutions is designed to quickly and accurately detect non-compliant system activity, anomalous behaviour, security issues and cyber threats.

AI-based analytics

## Our Platform

### Leverages Modern Technologies

So you know, a next-generation SIEM should be able to leverage machine learning and artificial intelligence to analyze and identify threats in real-time, with a high degree of accuracy and automation. This is what Cigau SIEM did.

### Data Lake & Automation

Cigau SIEM Solutions capable to collect, process, and store large volumes of security data in a data lake, to enable advanced analytics and visualization, and improve threat detection, also able to automate routine security tasks and orchestrate incident response workflows, to improve response time and reduce the workload of security teams.

# HERE ARE SOME OF THE KEY FEATURES OF CIGAU SIEM INCLUDE:

**Real-time Event monitoring**: Cigau SIEM capable to collect, correlate, and analyze security events in real-time from various sources, such as network devices, servers, and endpoints.

**Threat Detection**: Able to detect and alert on potential security threats, such as malware, phishing attacks, and suspicious behavior, based on predefined rules or machine learning algorithms.

**Incident Response**: Provide workflows and automation to enable effective and timely incident response, including investigation, containment, ticketing and remediation.

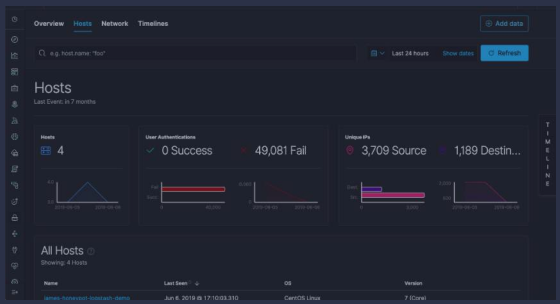
**Compliance Management:** Able to help organizations comply with regulatory requirements and security standards, by providing reports and dashboards that demonstrate adherence to relevant security controls.

**Data Analysis And Visualization:** Able to provide advanced data analytics and visualization capabilities, to enable security teams to quickly identify and investigate potential security threats and vulnerabilities.

**Integration With Other Security Tools:** Cigau SIEM able to integrate with other security tools, such as endpoint protection and vulnerability management solutions, to provide a more comprehensive security posture.

## PROVIDE ACTIONABLE INSIGHTS TO SECURITY TEAMS.

"Detection of anticipated cybersecurity threats is only a part of the solution for the security analyst – typically, that is where the hard work starts."



# HOLISTIC SECURITY SOLUTION

Provides a more comprehensive and integrated approach to security that can help organizations stay ahead of emerging threats and better protect their critical assets & improve overall security posture by addressing security gaps & vulnerabilities.

# FLEXIBLE AND SCALABLE DEPLOYMENT

Is designed to work with different data sources, such as logs, network traffic, and endpoint data, and can support a variety of deployment options, including on-premises, cloud, and hybrid environments.
